

pitch award

a new reality in VR for collaboration
investors deck

pitch video

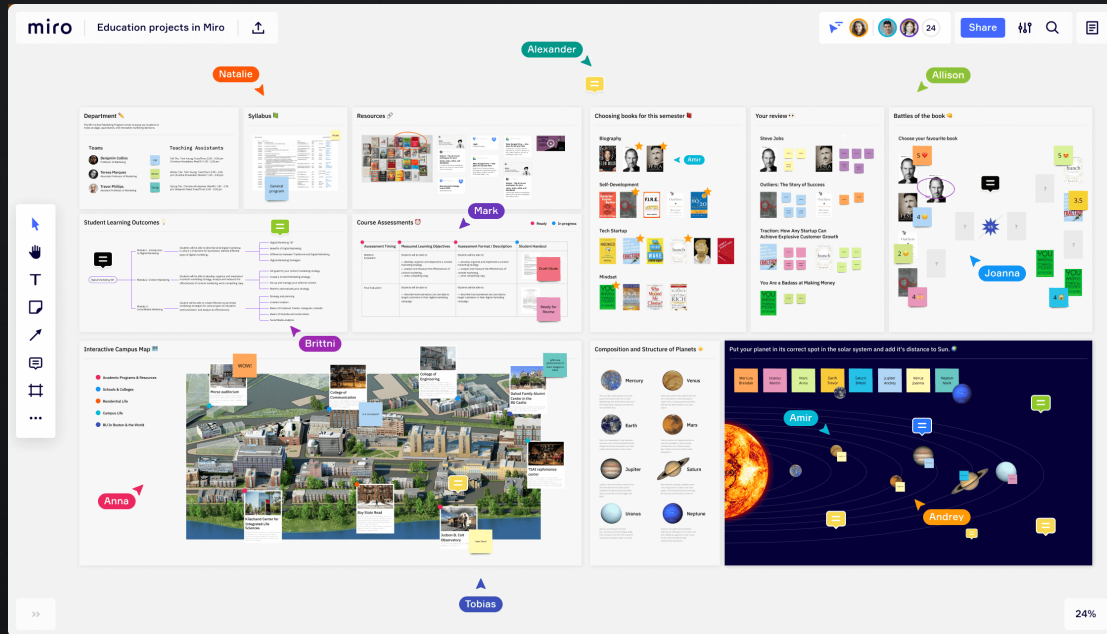

RAUM is a virtual reality software, that enables true teamwork, collaboration and social interaction for remote teams.

today

existing collaboration tools we use every day

RAUM

web-collaboration
very small items or limited view
difficult to follow story line
do presence of participants
hard to navigate

web-conferencing
just face to face meetings
not easy to focus
video wall with small videos of participants
or one video only with the presenter

new reality

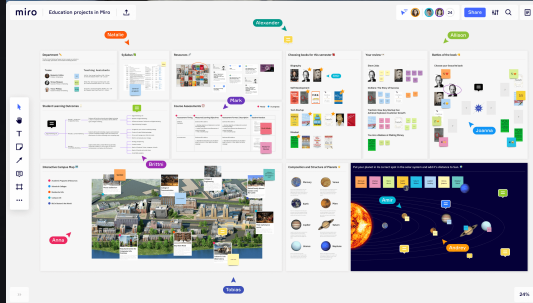

virtual work environments with spatial collaboration tools

real spatial breakout room

natural conference arena

side-by-side collaboration
in one room.

100% physical distancing
and 0% social distance.

web-conferencing is limited to the screen, RAUM opens fully immersive spaces.

unique benefits

- full spatial tools with low learning curve
- natural user interaction
- best in class spatial design
- developed in germany with focus on extended data protection

use cases

- meetings
- presentations
- workshops
- product & solution showcases
- trainings
- events

SaaS business model

subscription-based software service for medium-sized + enterprise companies.
